

# Modern Learning Lab

*A pilot program built on the Digital Architect Learning System, delivered by Momentum Learning Collective*

## Executive Overview

### Overview

**Momentum Learning Collective (MLC)** is an education-focused organization delivering integrated learning programs that support student engagement, academic confidence, and creative development. Our approach blends music as a learning interface, culturally responsive learning, and student support into a flexible, school-friendly model designed for pilot implementation and scalable impact. All programs delivered by Momentum Learning Collective are designed using the **Digital Architect Learning System** – a system-based approach to building skills, learning pathways, and measurable outcomes.

**Modern Learning Lab (MLL)** is Momentum Learning Collective's flagship pilot program, designed to deliver modern, culturally responsive learning through music, literacy, and creative technology. The program uses engaging, real-world learning environments to strengthen systems thinking, collaboration, and student confidence while aligning with school priorities.

---

### The Need

Many schools face increasing challenges related to:

- Student engagement and motivation
- Access to culturally responsive learning resources
- Limited time and capacity for enrichment programs
- The need for measurable, outcomes-based initiatives

MLC addresses these needs through structured, curriculum-aligned programs that complement existing school priorities.

---

## **Our Solution**

The Modern Learning Lab integrates Momentum Learning Collective's core learning programs into a flexible, modular pilot experience for schools.

Students engage in structured, project-based learning experiences that reflect how real-world systems operate — through roles, workflows, feedback, and outcomes.

MLC offers a modular learning ecosystem that schools can implement individually or as a combined pilot:

### **Momentum Music Method**

Music literacy and creative learning resources that strengthen focus, discipline, and expressive skills while reinforcing academic habits.

### **StoryRoot Publishing**

Age-appropriate literacy and Black history resources designed to support reading engagement and culturally responsive education goals.

Education Consulting & Student Support

Optional monitoring and guidance services that help schools and families track progress and reinforce learning outcomes.

---

## **Program Outcomes**

Participating schools can expect:

- Increased student engagement and participation
- Improved confidence in creative and academic expression
- Enhanced alignment with culturally responsive education frameworks
- Clear documentation of learning outcomes and feedback

---

## **Pilot Structure**

- Flexible pilot duration (short-term or semester-based)
- Minimal disruption to existing schedules
- Clear objectives and measurable outcomes
- Designed for evaluation and scalability

---

## **Why Momentum Learning Collective**

- School-friendly, low-risk pilot model with minimal staff burden
- Curriculum-aligned and outcomes-focused
- Modular programs tailored to school needs
- Built for partnership, not replacement of existing instruction

---

## **Next Steps**

Momentum Learning Collective is currently offering pilot partnerships with select schools.

We welcome the opportunity to discuss program alignment, pilot scope, and implementation timelines.
